In the version of this article initially published, the text entries in Eqn 1 and Eqn 4 were mistakenly misspelled which presented it in an illegible format. The actual values for Eqn 1 and Eqn 4 are updated and presented here:

$$\text{Precision } (p) = \frac{TP}{TP + FP} \quad [\text{Eqn 1}]$$

$$F - \text{measure} = \frac{2 * (\text{Recall} * \text{Precision})}{(\text{Recall} + \text{Precision})} \quad [\text{Eqn 4}]$$

These corrections do not alter the study's findings of significance or overall interpretation of the study results. The errors have been corrected in the PDF version of the article. The publisher apologises for any inconvenience caused.
